New Design

We are excited to share our new patented Clamshell lid design. This lid is helping to revolutionize the roll off waste industry. With the heightened awareness to safety and

environmental issues, customers are more often requesting lidded containers. This **new, innovative** lid is safe and easy for anyone to use and secures with only the slightest effort. It keeps the waste in and prevents illegal dumping or scavenging.

Frequently Asked Questions:

Question: Do you ship to BC?

Answer: With our nesting style front load and roll off bins we have been able to ship cost-effectively throughout Western Canada and the Northern states.

Question: What is your lead time, and how can I avoid lengthy lead times?

Answer: From date of order we strive for a 2-3 week delivery timeline. During peak times and number of orders in the production queue this lead time may fluctuate to 2-8 weeks. If you have a possible upcoming contract you can contact us to arrange holding a place in our production queue.

"And quit yelling, 'Finders keepers, losers weepers.'"

Customer Satisfaction:

I have been enjoying my new clam shell bin very much, it only takes one person to open & close it. I would highly recommend this bin to all your customers. Never exchange it for anything else!

Our Mission

To build lasting relationships by building better containers!

We started using the portable litter fences late 2018. We have found it easy to move the litter fence with the dozer blade on our wheel loader. They help contain the litter to a smaller area, **We wish we would have ordered them sooner.**
